

Summary Report

01/01/2025 – 12/31/2025

TOTAL HOURS: 150:45:14

PROJECT	DURATION
Verdyn	150:45:14

TIME ENTRY	DURATION
level design and building built and making presentation and testing and dying	17:00:00
UI implementation and fixes and clean up, credits animation fix, char fix, level design start and making 'gallery' and preparing scene and applying materials	10:30:00
AGAIN TROUBLES WITH GIT - LV0 after folder clean up push broken, searching new assets in fab + upload, working on ones vanishing platforms to make them better, starting collision research, goldmaster presentations of others	06:25:00
documentation	05:47:14
Ui	05:35:00
restoring project via git issues with naming and loading and levels and ui and pushing and discarding and unstaging	05:30:00
cutting UI images and uploading them to unreal	05:21:00
started to generate new UI and install voice coding, taking with Linus about UI and saving code	04:52:00
giving puddles textures and beginning of smoother edge	04:30:00
collisions for all small street things and mechanics and fixing vanishing platforms and adding tont to some materials	04:22:00
git lfs struggle, lena materials and normals, val uns, flo models	04:15:00
animation blend of push and walking working, ui implementation and New generation	04:00:00

● creating git via fork and lsd and cleaning art folders	04:00:00
● puddles - trying + failing on slopes and smoothing; changing textures and searching for fab models and pushing step by step to git	04:00:00
● polishing - animation plant back, buttons better, sound cutscene, foliage in build, note readability etc	03:58:00
● talking with lena, silviu, Heiko, learning about unreal painter and fab	03:50:00
● wall jump rotation working with animation, any key working, making Button and switch safer and cleaner	03:45:00
● wall jump and further clean up	03:40:00
● ui assets add into engine	03:30:00
● clean up, camera through thin things start, textures for flower stem, Button and switch in substance painter, some reimpirts via blender	03:00:00
● pitches	03:00:00
● camera through thin things, construction site mesh division, blender tutorials and basics	02:55:00
● further code clean up, getting the controller vibrations for all cases, changing the windows trigger and cutscene code, adding a material change to the win trigger if only one char is there	02:35:00
● generating more UI assets	02:30:00
● git lost budget and download and fix	02:30:00
● making events on customized spline meshes work x.x	02:26:00
● presentation wednesday Milestone 1	02:25:00
● setting up the project via git on laptop and updating toggle, redoing some UI assets	02:15:00
● plan for new project, toDos, haves, presentation	02:13:00
● generating more ui assets, redoing some, cropping, making backgrounds transparent	02:09:00
● substance tutorial with flo, creating textures together, them trying alone	02:05:00
● playing super Mario odyssey as reference for wall jump rotation and feeling and for parcozrs and level design	02:00:00
● project kickoff and first planning	02:00:00
● talk with lena about textures, making lists for further textures and assets etc	01:50:00
● Lena and silviu meeting	01:35:00
● Other time entries	08:27:00

PROJECT - TIME ENTRY DURATION PERCENTAGE

● Verdyn	150:45:14	100.0%
AGAIN TROUBLES WITH GIT - LV0 after folder clean up push broken, searching new assets in fab + upload, working on ones vanishing platforms to make them better, starting collision research, goldmaster presentations of others	06:25:00	4.26%
animation blend of push and walking working, ui implementation and New generation	04:00:00	2.65%
camera through thin things, construction site mesh division, blender tutorials and basics	02:55:00	1.93%

PROJECT - TIME ENTRY	DURATION	PERCENTAGE
clean up, camera through thin things start, textures for flower stem, Button and switch in substance painter, some reimpirts via blender	03:00:00	1.99%
collisions for all small street things and mechanics and fixing vanishing platforms and adding tont to some materials	04:22:00	2.9%
creating git via fork and lsd and cleaning art folders	04:00:00	2.65%
cutting UI images and uploading them to unreal	05:21:00	3.55%
DAY TIME NEEDED folder clean up and bug checking and start of redo vanishing platforms	30:00 min	0.33%
documentation	05:47:14	3.84%
downloading project via git again and fighting with git locks and logs and staged changes	01:00:00	0.66%
further code clean up, getting the controller vibrations for all cases, changing the windows trigger and cutscene code, adding a material change to the win trigger if only one char is there	02:35:00	1.71%
generating more UI assets	02:30:00	1.66%
generating more ui assets, redoing some, cropping, making backgrounds transparent	02:09:00	1.43%
git lfs struggle, lena materials and normals, val uns, flo models	04:15:00	2.82%
git lost budget and download and fix	02:30:00	1.66%
giving puddles textures and beginning of smoother edge	04:30:00	2.98%
installing perforce, update unreal, download duoDash, search for new name	01:30:00	0.99%
Lena and silviu meeting	01:35:00	1.05%
level design and building built and making presentation and testing and dying	17:00:00	11.28%
lv 0 fix, adding back first cutscene	30:00 min	0.33%

PROJECT - TIME ENTRY	DURATION	PERCENTAGE
making events on customized spline meshes work x.x	02:26:00	1.61%
pitches	03:00:00	1.99%
plan for new project, toDos, haves, presentation	02:13:00	1.47%
playing super Mario odyssey as reference for wall jump rotation and feeling and for parcozrs and level design	02:00:00	1.33%
polishing - animation plant back, buttons better, sound cutscene, foliage in build, note readability etc	03:58:00	2.63%
presentation preparation and zip upload	01:08:00	0.75%
presentation wednesday Milestone 1	02:25:00	1.6%
project kickoff and first planning	02:00:00	1.33%
puddles - trying + failing on slopes and smoothing; changing textures and searching for fab models and pushing step by step to git	04:00:00	2.65%
pushing UI folder to fork in prep for laptop tmr and sending git link	10:00 min	0.11%
restoring project via git issues with naming and loading and levels and ui and pushing and discarding and unstaging	05:30:00	3.65%
setting up the project via git on laptop and updating toggle, redoing some UI assets	02:15:00	1.49%
started to generate new UI and install voice coding, taking with Linus about UI and saving code	04:52:00	3.23%
substance tutorial with flo, creating textures together, them trying alone	02:05:00	1.38%
talk with lena about textures, making lists for further textures and assets etc	01:50:00	1.22%
talking with lena, silviu, Heiko, learning about unreal painter and fab	03:50:00	2.54%
toDos planning for today and next week	30:00 min	0.33%

PROJECT - TIME ENTRY	DURATION	PERCENTAGE
trampoline fix, camera fix, starting to fix prompt collision triggers	01:14:00	0.82%
Ui	05:35:00	3.7%
ui assets add into engine	03:30:00	2.32%
UI implementation and fixes and clean up, credits animation fix, char fix, level design start and making 'gallery' and preparing scene and applying materials	10:30:00	6.96%
wall jump and further clean up	03:40:00	2.43%
wall jump rotation working with animation, any key working, making Button and switch safer and cleaner	03:45:00	2.49%
with lena - unreal painter, materials, LODs	01:25:00	0.94%
with val tutorial for substance painter	30:00 min	0.33%
